MEMORANDUM FOR: Assistant for Plans & Development, NPIC

ATTENTION :

FROM :

SUBJECT :

[REDACTED]

Chief, Imagery Analysis Division, CIA

Request for Development of Protective Case
for [REDACTED] Measuring Eyepieces

1. In order to add a mensuration capability to the [REDACTED] High Power Stereoviewer (Dynazoom) the Imagery Analysis Division is purchasing a set of [REDACTED] measuring eyepieces for each of its Dynazooms. Each set of [REDACTED] eyepieces has four components as follows:

1 each, [REDACTED] number 5675, screw micrometer eyepiece, 15X;
1 each, [REDACTED] number 5670, goniometer eyepiece, 15X;
1 each, [REDACTED] number 5560, compensating eyepiece, 15X;
1 each, [REDACTED] number 5560P, compensating eyepiece, 15X,
modified for use with Filar screw micrometer eyepiece.

2. It is requested that the Plans & Development Staff initiate action to develop a protective case for the above set of eyepieces, similar in construction and appearance to the Optics kit supplied by [REDACTED] with the Dynazoom. Either a separate case specifically for these four eyepieces; or a modification of the present [REDACTED] Optics kit to allow spaces for these four eyepieces, would be acceptable to the Imagery Analysis Division.

3. The Imagery Analysis Division has a requirement for approximately 55 such protective cases through fiscal year 67. This allows for current purchase plans for [REDACTED] Dynazooms and measuring eyepieces for each. These cases will be required by February, 1966, as the first sets of eyepieces should be in-house at that time.
